## **DETAILED ACTION**

Applicant's election of Group XIII in Paper No. 13, filed 10-07-02 is acknowledged as is the rejoinder of Group VII with Group XIII. However, in view of newly added claims 59-78, a species election on said elected Group has been imposed.

## Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A method comprising administering a therapeutically effective amount of a MHC Class II polypeptide, wherein said polypeptide comprises a <u>specific</u> antigenic determinant, wherein said antigenic determinant is linked in a <u>specific</u> manner, wherein administering said polypeptide reduces a <u>specific</u> immune response, to treat a <u>specific</u> disease.

Applicant is required to elect a method comprising:

- A) a specific antigenic determinant, such as SEQ ID NO:25 disclosed on page 27,
- B) a specific manner of linking said determinant, such as covalently or non covalently as recited in claims 63 and 66,
- C) a specific immune response that is reduced, such as a decrease in an influx of an nk cell, as recited in claim 38,
  - D) a specific disease that is treated such as one recited in claim 59.

The species are distinct each from the other for the following reasons:

Art Unit: 1644

A) Each of the antigenic determinants has a distinct structure and associated biochemical properties.

- B) Determinants linked covalently verses noncovalently have distinct set of properties and therapeutic uses.
- C) Each specifc immune response comprises a distinct subset of cells with distinct properties and functions.
- D) Each of the specific diseases has a different etiology, clinical presentations and treatment modalities.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 37-40, 54 and 59-78 are generic in at least one aspect.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1644

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy M. DeCloux whose telephone number is 703 306-5821. The examiner can normally be reached on M-F 8:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 703 308-3973. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305-3014 for regular communications and 703 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-0196.
